

A better mousetrap? We think so . . .

Omni*Turn* Zip Loader on GT-75

Fast
Simple
Compact
Smart!

Handles bars or parts 1-1/2 to 26 inches long; 1/8 to 1-1/16 diameter.

It's a magazine bar loader!

Loads bar for machining and cutoff; pushes more bar for next part.

At end of bar, Zip Loader ejects remnant and loads new bar.

Tray holds up to 225 feet of barstock for hours of un-attended operation.

It's a shaft loader!

Loads part for machining and closes collet or chuck.

Then ejects finished part and gets next part.

OmniTurn Zip Loader on GT-Jr

Also available for OmniTurn equipped Hardinge® type chuckers (DSM, HC, CHNC etc).

Fast: Unloads finished 6" long part and loads next part in less than 4 seconds; ejects remnant and loads new 24" bar in 10 seconds.

Compact: Attaches directly to GT-75 or GT-Jr or OmniTurn equipped Hardinge® type chuckers; adds only about 5 feet to overall length; width of loader is 30 inches.

Omni Zip is an automatic shaft loader or an automatic bar loader.
Omni Zip works with barstock up to 26 inches long; 1/16 to 1-1/16 diameter.
Omni Zip adds only five feet to overall length of machine.
