

OmniTurn ZipLoader Magazine Bar Loader

Automatic short bar loader!

Accommodates 26" bar, 1/8" to 1" diameter. Adds only five feet to overall length of lathe. At end of bar, loader automatically ejects remnant and loads new bar.

Automatic shaft loader!

Accommodates parts or shafts from 1" to 26" long, 1/16" to 1" diameter. Loads part for machining and locks it in collet. Ejects finished part, and loads next part in as little as four seconds.

Fast

- Unloads finished 6" long part and loads next part in less than four seconds.
- Ejects remnant and loads new 24" bar in ten seconds.

Compact

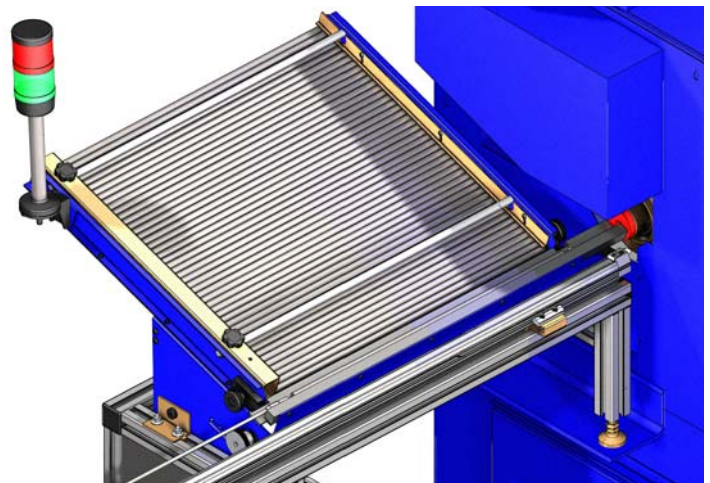

- Adds about 5 feet to overall length, but provides equivalent 20 feet of 1/2" bar.
- Width of loader is 30 inches.

Versatile

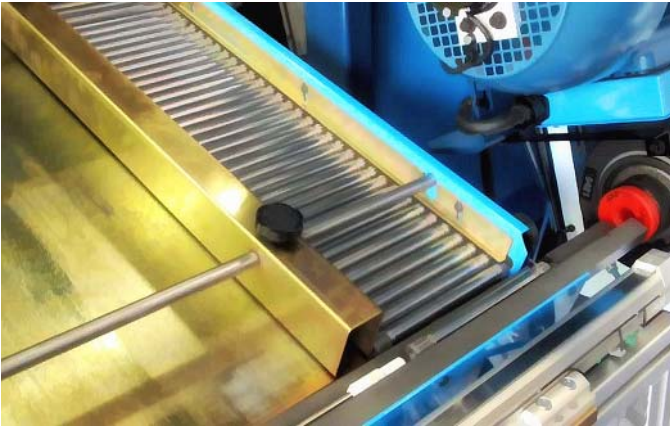

- Loads bars or parts 1-1/2 to 25" long.
- Handles parts 0.090" to 1-1/8 diameter.
- Rear-qualify feature provides ± 0.002 " overall length accuracy.

Automatic bar loader!

Loads bar for machining and cutoff; pushes more bar for next part. At end of bar, ZipLoader automatically ejects remnant and loads new bar. Tray holds 40 1/2" x 26" bars (equivalent to more than 20 feet of bar) for hours of unattended operation. Optional **parts hopper** available.

OmniTurn ZipLoader Magazine Bar Loader

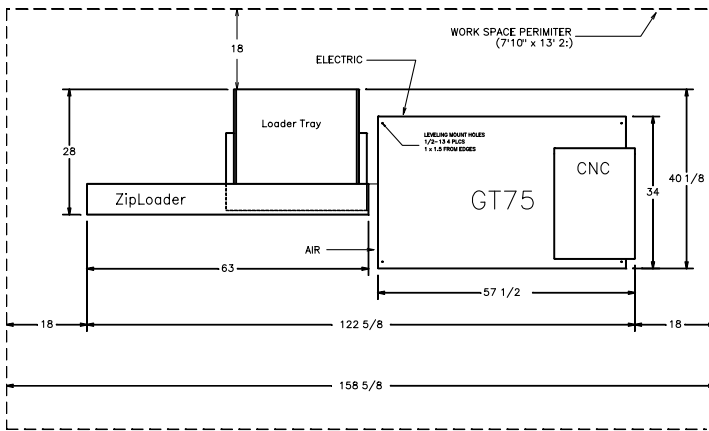

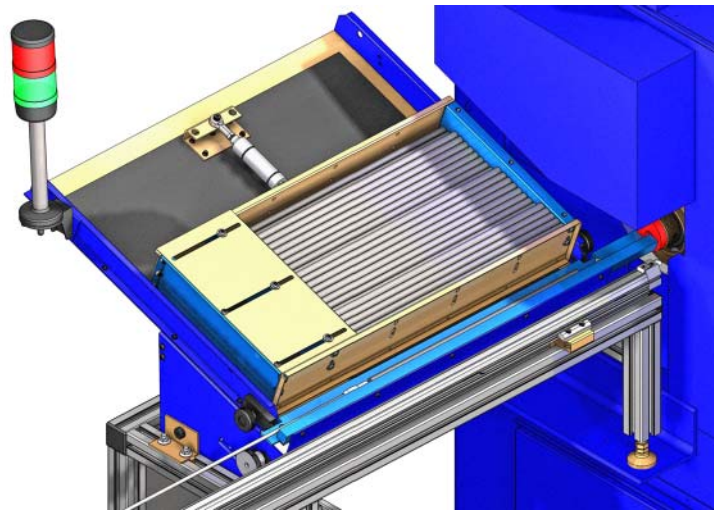

Automatic shaft loader!

Loads blank or shaft for machining. When machining is complete, ejects finished part and loads next part. Tray holds 40 1/2" diameter parts. Optional **parts hopper** available.

Optional parts hopper!

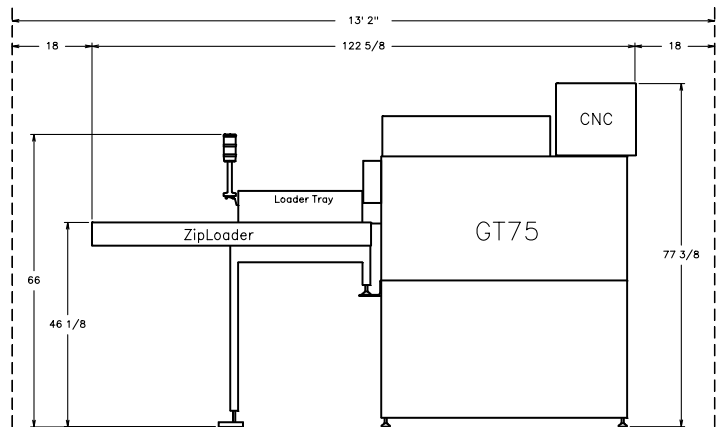

The parts hopper (799-39-101) is designed to be used with the Omniturn Zip Loader to increase the number of parts that can be loaded with the ZipLoader.

The hopper allows small diameter parts (1/8" - 1/2") to be loaded in quantity in a 3-1/2"h x 11-3/4" x 24-1/8"w box. The length of the part can be from approximately 2 inches, to 24 inches. The parts are then presented to the top of the knife in the ZipLoader, and loaded into the rear of the spindle for machining.
